state info:

3. This is the screen that appears when they click on advanced settings make sure it is as shown below then click save have the customer power cycle the device and re-check speed

The screenshot displays a network configuration interface with a blue sidebar on the left and a white main content area. The sidebar contains the following menu items: Home, Network, WiFi Setup, Advanced Setup (highlighted), Service Application, AC Management, System Management, and System Tools. The main content area has a top navigation bar with tabs: WAN, 3G/4G (selected), LAN, DHCP, Static Route, Terminal control, QoS Setup, and NAT Setup. The 3G/4G settings are as follows:

- 4G is preferred: OFF
- Dialing mode: GobiNet (dropdown)
- Country/Area: USA (dropdown)
- ISP: T-Mobile (dropdown)
- APN server (optional): epc.tmobile.com
- Connection number: _____
- PIN code: _____
- Account: _____
- Password: _____

Below these fields, there is a section titled "Advanced Setup" with a red warning message: "If your network operator needs to configure APN and other information to access the mobile network normally, please enter advanced settings". At the bottom of this section are three buttons: "Save", "disconnect", and "Reconnect".

At the very bottom of the main content area, there is a "Network selection:" dropdown menu set to "AUTO" and a "Save" button.
